### Comments by Arti Ots, incoming CEO

“In 2014, Kcell maintained its leading market position in the face of intensifying competition and we have delivered results in line with expectations (excluding one-off items) with total revenue growth of 0.8 percent, an industry leading EBITDA margin of 56.1 percent and a CAPEX-to-sales ratio of 11.2 percent.

We have continued to roll out our 3G services nationally and have driven acceleration in smartphone penetration with the successful launch of the iPhone and other smartphone bundles. We have also introduced a number of attractive data-centric services during the year. These have all been instrumental in further increasing mobile data usage and data revenues.

Kcell has particularly focused on the creation of more widely affordable mobile Internet services. These efforts have resulted in the launch of low-end smartphone bundles - pay-as-you-go "Easy" Internet products aimed at occasional users as well as simplified monthly packages.

In 2015 and beyond we will continue to focus on our existing customer base and on boosting data revenue through the acceleration of smartphone penetration and increasing data consumption, whilst developing our B2B business offering to provide our clients with core business solutions. We will also invest further in our network to maintain and improve the quality of the services we provide. At the same time, the management team is committed to establishing strong leadership and a culture of responsible business practice to ensure that Kcell is well placed to maximize all opportunities to drive long term value creation.”

Voice traffic increased by 5.1 percent to 6,154 million minutes (5,855), as a result of an introduction of bundled offers. Outgoing voice revenue decreased by 14.5 percent to KZT 23,395 million (27,352).

Interconnect revenue declined by 8.6 percent to KZT 7,343 million (8,033) mainly as a result of a 15 percent decrease in the interconnect rate. This was partially offset by a higher volume of incoming calls from other mobile operators' subscribers.

## Legal proceedings

### “Daytime Unlimited” service

On 5 September 2014, the order of the Agency of the Republic of Kazakhstan for Competition Protection (ACP) came into force obliging Kcell:

- 1) to stop collecting subscription fees under the “Daytime Unlimited” service when there are insufficient funds on the account (executed by the Company);
- 2) to ensure interruption of connection when subscribers’ balance reaches zero;
- 3) to ensure refund to subscribers for charges made in view of non-interruption of their connection when their balance reached zero.

Compliance with the Order requires major technical changes of the billing system; Kcell has therefore filed a request to postpone the execution of this order. On 16 October 2014, the court denied this request. The Company has filed this request with the ACP.

Kcell will, therefore, incur additional expenses. Total revenue gained from continuing to provide services when there are insufficient funds on subscribers’ account, amounted to KZT 1.6 billion and was accrued as a provision. The exact amount is to be determined subject to clarification of the ACP order.

### “Always Available” service

On 7 August 2014, the Administrative Court upheld the decision of the lower court. This resulted in the Company being brought to administrative responsibility under Article 147, part 3 of the Code of Administrative Offences of the Republic of Kazakhstan. Kcell was consequently issued a fine of KZT 41.8 million, which has been paid.

#### **Applicable to both cases:**

Kcell intends to further challenge these cases. However, the ACP, in its turn, may also challenge the amount of fines in court through the prosecution authorities.

The information was submitted for publication at 09:00 ALMT on 29 January 2015.
